About this app

The new RemoteLock app makes it easy to manage and monitor all of your connected locks.

- View activity on one or many locks through the easy-to-use mobile interface.
- Provide temporary access codes remotely for your rental property with the RemoteLock mobile app
- Update property portfolio, including adding users, devices and locations.
- Use search to find specific devices if you have multiple devices....

App still does not work on Android systems and hasn't for several months. If I hadn't spent so much money on the locks I would cancel my membership and move on. Works great when it works, however I'm no longer able to open the app on my Android. I was hopeful with the recent update the problem would be resolved but it was not. This has been an issue for an extended period of time so I am beyond frustration at this point.

Sadly this so titled "Admin" app doesn't administer at all. You are directed to their Web page instead. Also the information unhelpfully displays "upcoming" instead of a date and time. You cannot order it in customer or date order so there is very little you can do practically with this app, apart from open and close a door remotely. All I want to see is a list in date order with time start (and end), customer name and code and also without having to click into each record to see the detail.
