Inconsistent Functionality

★★★★★

05/09/2018

Chooseup

I purchased the August Pro expecting that this lock would open as I approach the door. It rarely opens the lock as expected. Maybe two times since Jan 2018. Upon calling tech support, and after I gave him the problem and use scenario, his questions centered on other Bluetooth devices that are on or around me when I [..more](#)

One Thing Missing

★★★★☆

09/12/2020

Ndustrialhippie

I've had 2 August locks now. I just bought the WiFi lock and it is a significant functional upgrade to the first lock I had which needed the bridge. As long as my husband and I are the only ones entering and leaving the house, everything seems to work perfectly. Unfortunately, since COVID hit, I haven't had much [more](#)

please disable the automatic selection of wifi or...

★★★★☆

jb3401

a recent app update introduced an automatic selection of wifi vs bluetooth when connecting to a lock; that significantly slows down unlocking, to the point where i have had to pull the wifi bridges on any locks i want to access fast; the way i use august — as i walk toward one of my ten doors equipped with august [more](#)

No brainer for any homeowner

★★★★★

12/08/2025

MWhittington77

Lived in a place with one of these on the main door and it's the best peace of mind knowing you can walk through a door with your hands full and the door will lock automatically right behind you. The ease of use without fumbling a key is fantastic, one caveat is the time it takes to connect can exceed 20-30 seconds [more](#)

Auto lock needs improvement.

08/20/2021

★★★★☆☆

Mike 164

I really like my August Smart Lock Pro but find limited practicality with the auto lock feature. It locks my door automatically when closed for a set amount of time (or instantly if I so choose.) While this would seem beneficial in making sure I don't forget or when my hands are full, why would I want to risk being locked out [where](#)

Frustratingly Painful App for a Nice Lock

08/21/2019

★★★★☆☆

sebastian®

The lock works well, but clearly the app UX designers nor product manager use their own product and missed the mark for new adopters who start with a single (one) lock. Basically, if you have *one* lock, you're forced to use the app's Keychain screen which creates an extra step plus load time before you can lock or unlock [more](#)

Good not great

Hemanshu Bahl

I love my August Apple HomeKit smart lock or at least I did. It did what it was supposed to, lock and unlock when you pushed the button on the August app or Apple HomeKit. However, since new firmware updates or iOS 11 it is no longer reliable like it was (locked and unlocked 90+% of the time and now sits closer to [more](#)

August Wifi Lock is buggy

01/22/2024

★★★★☆☆

JoeyAM

The August WiFi lock is NOT worth getting and I say this as someone who already had an August lock without built in WiFi. The built in WiFi drains the lock battery within a few weeks. August acknowledges this and recommends you get a Connect bridge (which defeats the purpose of the built in WiFi) The ... [more](#)

iPhone force touch (now long press) does nothi...

09/25/2020

★★★★☆☆

DESMO1198s

I use the app all the time when I head out and I'm not the one driving so I get to leave my keys at home. Normally when I get home I pull out my phone just long press (force touch on older iPhones) the lock / unlock option appears I choose unlock and I'm in. Now every time I do the long press, I get just the standard [more](#)

READ BEFORE YOU BUY!! the most unreliable app!

10/22/2018

bmusante

Hands down the most unreliable app on my phone !Just do yourself a favor and take that junk lock back to what ever store while you still can. There are better, cheaper, more reliable options out there. These guys refuse to update the software in a way to actually make it reliable. I have literally had to delete and [more](#)
