Amazing - everything they say about it is true!

12/05/2023
DriskyMama

As per the other reviews, this is a great little lock. The fingerprint function makes it so easy and customized to open the door. The reader works well, even with my impossible to read fingerprints. It does take a few tries, though. The autolock feature is great. You can set it from 10 seconds to 30 minutes. You do have to turn it [more](#)

Improvement over original August lock. Still some...

09/08/2025
JonK3464

I'm an original August lock owner and decided to upgrade the whole lock when my keypad died. August finally fixed the worst problem about the lock itself when they redesigned the cover, which now pops up when you press a corner and doesn't fall off when you open or close the lock manually like the original did [more](#)

Integration Needs Help

01/04/2022
SCSpidey

I would give this app a 4/5 star rating for its features and ability to control the lock. Where it suffers is getting it to integrate with HomeKit and other automation systems. So, in order to use Siri, everyone needs to have the highest level of authorization which is ok. It is not so painful to get my wife and two daughters to ... [more](#)

Am I missing something?

04/14/2023
IvanBiley

App works fine, but why do I need to make 2-3 clicks to get to the right lock? To clarify - the hardware/locks themselves are amazing and I am buying more - but the app is very limited. I mostly control the locks through Apple HomeKit. With HomeKit through bluetooth (base model lock), there is a delay when operating [there](#)

Got orphaned with new firmware update(my fix...

07/10/2024

LIGuy74

This app worked great, as did the lock, and then they rolled out a firmware update which has seemed to orphan the lock from the app. As the old saying goes " if it ain't broke, don't fix it"! I had to remove my batteries and the communication module from the lock wait a minute, and then reinstall. After that, everything went [more](#)

Security Risk!!!! Beware!!!!

04/29/2021

BeamerDude

BEWARE!!! This app and its associated lock are a HUGE security risk!!! Case in point: After receiving help from Yale tech support just now, I've learned that if someone ever closes the door and [more](#)

Don't buy

04/23/2024

Jussandjuss

I bought 2, one for an Airbnb and one for my own house. I liked the design and the password for the airbnb is useful. The problem is that the app doesn't tell you when the batteries life (4 batteries AAA) the app doesn't even send you a message to prevent. One day my Airbnb guest were no able to go into the house on a rain [more](#)

Fix this!

12/26/2024

Notwell25

If you are added as a guest to someone, you cannot remove the home from your keychain. In my case, I bought an August for an ex girlfriend three years ago and a Yale for my current girlfriend this Christmas. The ex never removed me as a guest on her lock. My new girlfriend saw the other girl in my keychain list as we [were](#)

Dropped support for Linus lock, should have...

08/30/2023

oleoleolesam

I'm a strange case admittedly (using the Linus lock in the US where it isn't sold) but I had been happily using the Linus and Assure locks with the Yale Access app for about 2 years now. After weeks of annoying popups to switch to the Yale Home app (not something I can access in the US) I have seen the Linus [is more](#)

Worst excuse for a SECURITY lock app

12/05/2024

★☆☆☆☆

kenshinrocks

Since this was the first smart lock that I've used I didn't realize what features were essential. I did my homework comparing but thought this was going to be worth the high cost.WRONG! I have a Yale Assure Lock 2 which I bought in early 2023. I had problems beginning with the setup. When it finally "worked" it [more](#)
